RE: Facility ID No. 053-00017, Bettencourt B-6, Jerome  
Completeness Determination of PTC Application, construction and operation of an  
anaerobic digester and generator sets.

Dear Mr. Juergens:

On March 26, 2008, the Department of Environmental Quality (DEQ) received a Permit to Construct application from Bettencourt B-6 for the construction of an anaerobic digester and three reciprocating engines located at Jerome. The application materials have been reviewed and the application determined complete. Therefore, DEQ will proceed with the processing of this permit application in accordance with IDAPA 58.01.01.200 (Rules for the Control of Air Pollution in Idaho)(Rules).

Although the application has been declared complete, it may be necessary to solicit further information to assist us during our review. The permit evaluation phase may take up to 60 days, although the application will be processed as expeditiously as our resources allow. Please be aware that you may submit a written request to DEQ to provide a draft permit for review prior to issuance of a final permit in accordance with IDAPA 58.01.01.209.01.b.i. (Rules). Additionally, an opportunity for a public comment period will be provided in accordance with IDAPA 58.01.01.209.01.c. (Rules). Should a comment period be required, at least 45 days will be added to the time needed to process your application.

If you have any questions about this letter or about the air quality permitting process, please contact me at (208) 373-0502 or [robert.baldwin@deq.idaho.gov](mailto:robert.baldwin@deq.idaho.gov).

Sincerely,

*Robert Baldwin*
